Facts

EAB's barrier is intended to protect pallet racking and other warehouse equipment from impacts. Furthermore, it can also be used as protection for expensive machinery or electrical cabinets and in offices, etc. The barrier with mounted guard rail functions perfectly as a divider, e.g. for a pathway used by personnel. The barrier has a modular design that can easily be adapted depending on requirements. All component parts are attached by screws to the attachment point. Installing the item on concrete floors requires the use of expansion screws.

1. Barrier system

Height: 400 mm
Attachment: Anchor rod M16x120 with PU-spring.

2. Barrier with hand rail

Modular design.
Height: 180 mm, handrail 1100 mm
Attachment: Anchor bolt M12x100

3. L-profile and Bollard

L-profile height: 150 mm
Attachment: Anchor bolt M16x120
Bollard height: 600 mm
Attachment: Anchor bolt M16x120

4. Barrier

Modular design.
Height: 400 mm
Attachment: Anchor bolt M12x100

5. Column protector

Height: 400 mm
Attachment: Anchor rod M16x120 with PU-spring. Sized for specific columns.

6. Column protector

Height: 200mm
Attachment: Anchor bolt M12x100
Sized for specific columns.

- + Wide range of Standard products
- + Five year guarantee
- + Concept, project management, construction and assembly
- + Tried-and-tested products
- + One project leader = a single contact person throughout the project
- + Production and product development at the same site
- + Extensive experience and solid know-how in steel structures (valuable know-how gained in many warehouse equipping projects)
- + Everything in good time. We ask any questions that arise before making our offer to avoid unnecessary extra costs
- + Our own testing department
- + A long-term approach to business and customer relationships
